

User guide

Usage

1. In the **View Issue** screen, go to **More Actions > Create and Link Config...**

2. And you are taken to a screen where you can choose from the operations and enter the project, issue type and link type as necessary as below:

Create and Link issue configuration

The different settings that can be configured for creating an issue are

- **Operation:** Choose a create and link operation. The operation is defined or configured in the [Administrator guide](#).
- **Project:** Choose the target project for the new issue.
- **Issue Type:** Choose the issue type for the new issue.

- **Link Type:** Choose the outward link for the link with the new issue.
