

Use Cases

Welcome!

We've prepared some extensive guides here for you to supercharge your productivity with our add-ons.

Click on any use case to learn more about how our add-ons can assist you in building a good documentation strategy.

Recipes are also provided here so you can save the hassle of building your own reports from scratch, refer to our tutorial on [How to import recipes into your Confluence instance](#).

Check out any of the following use cases:

Reporting on Comala Workflows data

The screenshot shows a dashboard with two main sections: 'Tasks assigned to me' and 'Pages that require my approval'. The 'Tasks assigned to me' section contains a table with columns for Page Title, Current State, Tasks assigned to me, and Last modified. The 'Pages that require my approval' section contains a table with columns for Page Title, State, Approval action, Outstanding tasks, and Last approved by. Below the tables, there are detailed lists of tasks and comments for each page.

Featuring: Reporting for Confluence, Comala Workflows, Comala Workflows - Reporting Integration

Managing Reports using Scaffolding & Reporting

The screenshot shows a project overview page for 'Cafe Rockettoria - New Palo Alto Branch Project'. It includes a project overview section with a photo of the cafe, a project status and budget section, and a project details section with fields for Start Date, End Date, Launch Date, Number of subjects, and Overall status. There is also a 'Project Members' section listing team members.

Featuring: Scaffolding Forms & Templates, Reporting for Confluence, Linking for Confluence

Setting Up a Knowledge Base with Scaffolding

The screenshot shows a knowledge base page for 'Acme Corp IT Knowledge Base'. It features a search bar at the top, a section for 'Articles in this KB by labels' with a list of articles, and a 'FAQ' section. The page is designed with a clean, professional layout using scaffolding forms and templates.

Featuring: Scaffolding Forms & Templates, Linking for Confluence
