

What Versions of Salesforce are Compatible with the Connector?

Plugin:	Classic Connector for Salesforce & Jira
Question:	What Versions of Salesforce are Compatible with the Connector?
Answer:	<p>The Salesforce and JIRA connector requires the Salesforce.com API to be enabled. The Salesforce.com API is enabled by default for <i>Performance, Unlimited, Enterprise, and Developer Editions</i>. Some <i>Professional Edition</i> organizations may also have the API enabled.</p> <p>Lightning support is not available yet.</p>
