

Use Cases

Welcome!

We've prepared some extensive guides here for you to supercharge your productivity with our add-ons.

Click on any use case to learn more about how our add-ons can assist you in building a good documentation strategy.

Recipes are also provided here so you can save the hassle of building your own reports from scratch, refer to our tutorial on [How to import recipes into your Confluence instance](#).

Check out any of the following use cases:

Reporting on Comala Workflows data

The screenshot shows a dashboard with two main sections: 'Tasks assigned to me' and 'Pages that require my approval'. The 'Tasks assigned to me' section contains a table with columns for Page Title, Current State, Tasks assigned to me, and Last modified. The 'Pages that require my approval' section contains a table with columns for Page Title, State, Approval action, Outstanding tasks, and Last approved by. Below the tables, there are sections for 'Additional comments' and 'Additional comments'.
